

ABOUT JET TIME

Jet Time is a Danish-owned airline from 2006. The company operates purely business-to-business, delivering air transport solutions for charter companies and others with need for air transport.

Service and flexibility are core areas of Jet Time's business with a focus on making that little difference that creates good travel experience.

Since Jet Time's start-up, the business has been expanded to include ACMI (lease of flight capacity to other airlines), which is a business area that makes up an increasing proportion of Jet Time's production.

In 2014, Jet Time founded the Finnish subsidiary, Jet Time OY. Jet Time OY is placed in Helsinki, where two Boeing 737s are based.

Jet Time has since the start-up grown from being a small company with two aircraft and a handful of employees to become the largest Danish-owned airline and a large company in Denmark with an annual turnover of more than 1,2 billion DKK and more than 300 employees.

Jet Time operates a fleet consisting of six B737-700 passenger aircraft with bases in CPH, BLL and HEL. Crew on Danish and Finnish collective agreements mans the aircraft.

BUSINESS AREAS

Jet Time has two business areas as basis for the company's production.

CHARTER FLIGHTS

Charter production for travel companies and single charter flights.

Charter flights are typically booked 12 months in advance in a series of 10-26 weeks. Several series are usually booked at a time.

Covers also event based Ad Hoc flights and Special Charters for other customers such as football clubs, private companies and the Defence Command.

Charter productions constitutes annually approximately 85 % of Jet Time's turnover. Amongst the customers are TUI and Thomas Cook.

ACMI

Flights for other airlines

Jet Time flies on ACMI basis (**A**ircraft, **C**rew, **M**aintenance, **I**nsurance) for other airlines, as well as for companies with a temporary need for flight capacity.

ACMI production constitutes annually approximately 15 % of Jet Time's turnover. Amongst the customers are SAS, Finnair and Air Greenland.
