

Licensed Aircraft Engineer at Jettime

In our Technical Department in Copenhagen Airport, covering Line and Base Maintenance, we are recruiting Licensed Aircraft Engineers due to increase in our fleet.

Jettime's business areas are IT Charter Flights and ACMI, which we perform on a fleet of currently four Boeing 737 NG aircraft, which is planned to increase to seven aircraft by January 2022. Jettime merely operates as a Business-to-Business company by delivering flight transportation solutions to charter companies and airlines as well as private companies and public institutions.

We offer a full-time permanent position starting on or about 1st of January 2022. You will be working in a flexible work pattern and in accordance with our union agreement between Jettime and Dansk Metal.

Your skills and qualifications

- Valid Aircraft Maintenance License AML, EASA Part 66
- Certified Technician Boeing 737 NG (CFM56) B1/B2, is preferred but not a must
- Minimum 6 months relevant experience in the last 2 consecutive years, is preferred but not a must
- Fluent in English, spoken as well as written

Your main duties are

- Maintaining and certifying our Boeing 737 NG fleet daily
- Performing troubleshooting and testing on aircraft systems

We expect of you to

- Pass a 5 year security background check
- Hold a valid driver's license
- Possess working knowledge of IT computer systems (including MS Office)
- Maintain your work environment in a safe and clean manner
- Have a constructive mindset, seek dialogue, and value mutual flexibility

To be successful in your job, you manage different levels of workload and keep a good overview even under pressure. You work well independently as well as in teams; you are self-motivated and have good communication skills. Together we are very quality and safety minded and take responsibility of any given situation using our mutual problem solving, analytical and decision-making skills. Being a good colleague, you are flexible, willing to travel and assist with recovery of Jettime's aircraft in e.g. AOG situations and, of course, you have a good sense of humor, as our tone is loose and friendly.

We offer you a challenging and versatile job with a good work environment and dedicated and helpful colleagues, who are passionate about their work. You benefit from our pension plan, including health insurance.
