

From 07.02.2022, it is no longer necessary to present a negative covid-19 test upon entry into Portugal, IF you can present the EU Digital Covid Certificate, which states that you are fully vaccinated (2nd vaccination or booster, both valid for 270 days), or immunity passport showing that you have previously been infected (after issue on the 11th day and up to 180 days). Exceptions for presentation of proof or negative test are children under 12 years.

If you have not been vaccinated or have an immunity passport, a negative test must be presented (ANTIGENT TEST 24 HOURS before departure or PCR test 72 hours before departure).

From April 2022, it will no longer be necessary to complete the "Passenger Locator Card".
